Orange offers laptops for mobile broadband biz customers

Three bundles available

by Amy-Mae Elliott published on 16 September 2008

Orange has launched a new mobile broadband and laptop offer targeted specifically at the business market.

Small and medium business customers signing up to a new Orange Business Everywhere mobile broadband package will receive a business-spec HP laptop with Microsoft Windows Vista Business.

There are three new Business Everywhere with Laptop bundles each including an unlimited data allowance and 500 Wi-Fi minutes per month, which can be used at over 10,000 BT Openzone and The Cloud hotspots.

Depending on the package chosen, the HP laptop will come either embedded with an Orange SIM or with an Option ICON 225 USB dongle.

The new packages range from £35 to £45 per month for a 24-month contract, with the price varying according to the choice of laptop.

Business Everywhere with Laptop is available direct from Orange through the Online Shop, telesales and the business sales team.
