## 5-in-1 USB Charging and Data-Sync Cable available

Don't get yourself in a knot

by Katie Scott published on 23 September 2008

So you need to charge up a whole host of gadgets, but also need to get some new tunes onto your iPod.

Well here's a nifty solution - the 5-in-1 USB charging and data-sync cable, which is available now from Gadget4All.

It does what it says on the tin - namely - it is a 120cm cable but has five USB attachments so you can recharge gadgets and transfer data at the same time.

No price as yet.
