Dell quietly unveils the S2309W HD monitor

But no price as yet

by Katie Scott published on 29 September 2008

This is the latest 23-inch monitor from Dell, which delivers no less than 1080p HD viewing.

The S2309W is currently only on Dell's Canadian site, so we don't know whether it will be coming to the rest of the world or not, but, in the meantime, here are the specs.

You get 1920 x 1080 resolution, 5-millisecond response time, 300 cd/m2 brightness, 1000:1 contrast ratio and DVI / VGA inputs.

But no price listed as yet...
