T-Mobile G1 gets online emulator

Play with Android now

by Amy-Mae Elliott published on 7 October 2008

For any of you out there itching to get your hot little hands on the T-Mobile G1, the operator has a treat for you - an online emulator that lets you "play" with Android virtually.

Most of the phone's functions are reproduced on the site, so you can have an online walk-through of the new operating system. It's quite a slick interface and should stave off any Android pangs before the phone hits in November...
