SlingMedia's Slingcatcher now available

For £199.99

by Katie Scott published on 9 October 2008

We got a hands-on with SlingMedia's Slingcatcher device way back at the end of September, but today, it hit the shelves in the UK.

The Slingcatcher sends content from your computer or a hard drive to your TV, as well as from TV to TV when used in conjunction with a Slingbox on a LAN or WAN connection.

And if you use the upcoming Slingbox PRO-HD - this could include HD content.

The device is priced £199.99 and is available in the UK from Amazon.co.uk and Micro Anvika as well as via SlingMedia's own website - the link for which is below.

Make sure you check out our video quick review of the device too.
