Goccia glams speakers with gold

Little drops of opulence

by Katie Scott published on 10 October 2008

Goccia has taken speaker design to a whole new level with its golden drops design.

These stunning speakers may not be to everyone's taste but they are certainly unique (and are also limited edition).

They will hang from a ceiling or can be wall mounted, and apparently the sound's not bad.

But the price is on application - shudder!
