Teacup that sings (well plays CDs)

Tea and tune time

by Katie Scott published on 23 October 2008

You'd have to be a mad tea enthusiastic - someone who drinks at least 100 cups a day - to have brewed up this idea.

The singing teacup concept allows you to stick a CD into the "base" - in other words the saucer - and then the cup itself is the volume knob.

Digestive biscuits not included.
