3 launches new mobile broadband business packages

Up to 15GB included

by Amy-Mae Elliott published on 3 November 2008

3 Business has launched two new offers that it says will give small businesses more cost-effective access to mobile broadband.

The changes see 3 increasing the amount of data available to users in their existing small business bundles, as well as letting SMEs buying one mobile broadband package and getting another for half price.

The new bundles, called Broadband 5GB and Broadband 15GB, increase in-bundle data allowance from 3GB and 7GB to 5GB and 15GB respectively.

Additionally 3 Business is also allowing any small business buying an 18 or 24 month mobile broadband or voice package to buy a second plan at half price.

The new offerings and tariffs are available from now, more details at www.three.co.uk/business.
