Hitachi CP-X809J projector aimed at pros

5000 lumen brightness beast

by Katie Scott published on 17 November 2008

The Hitachi CP-X809J is an inorganic panel based projector which delivers a whopping 5000 lumens brightness.

This is thanks to a 275W lamp.

Resolution-wise, you get 1024 x 768.

But the projector also has a 1.2x zoom, Ethernet connectivity, power management, and 4x 4W SRS WOW speakers.

It has a 6700€ price tag though and is likely not to make it outside of Japan.
