## Roberts MP-Sound 53 launches

### Dab docker with USB and SD

by Amy-Mae Elliott published on 10 December 2008

Roberts has launched the MP-Sound 53 DAB/CD/FM sound system that comes complete with a universal iPod dock on top.

With an acoustically tuned wooden cabinet in a high gloss piano black finish and an "ice blue" display backlight, Roberts is angling the system as a stylish one-box music solution.

There's DAB and FM for radio plus a multi-format CD player that offers playback for recorded CDs with support for MP3 and WMA files.

In addition, the MP-Sound 53 gets a USB port for playback from a USB device and an SD card slot that's capable of recording from the radio or CDs.

The radio features various alarm settings and comes complete with a remote control. Additional features include 20 station presets, six position equaliser with separate bass and treble, line output socket, headphone socket and an auxiliary input.

The Sound 53 is on sale now for £249.99.
