Credit Crunch Christmas: Wharfedale 160GB PVR

Pocket-lint's Advent calendar of gift ideas: 7 days to go

by Ben Crompton published on 19 December 2008

Today's Credit Crunch Christmas offer takes the form of the Wharfedale 160GB DVD player and recorder with HDMI.

An especially nice piece of kit considering that eXpansys are offering it to you for £69.99, this is £60 off the normal price, but there's a catch, you have to order it today between 11am and 4pm.

The device has a built-in Freeview tuner allowing you to pause digital television and radio as well as record. When recording you can either choose to burn the programme onto a DVD or record it straight onto the 160GB hard drive.

With delivery possible in time for Christmas, this would let the recipient record all their favourite Christmas films and shows onto the hard drive which should store over 200 hours of programming.

Remember the offer of £69.99 is only available today, 19 December, from 11am to 4pm at eXpansys.com, and customers are limited to two units only. eXpansys says if you order today you can expect delivery by Saturday.

Follow the link below to check out the full info for this great Christmas deal.

More deals tomorrow and Sunday, so be sure to check back in.
