Daily Tech Deal: i-mate Ultimate 9502 smartphone

Money saving deals, offers and innovations

by Ben Crompton published on 6 January 2009

For today's Daily Tech Deal we have a great offer that is available from online retailer eXpansys.

It is the i-mate Ultimate 9502 smartphone with a normal price of £334.99, but if you use the link below you could save yourself over £130 and snap it up for £199.99.

You will have to be quick though because eXpansys tells us that they are receiving 100 units by the end of the week, the idea being that you pre-order now.

The Ultimate 9502 has a VGA display, integrated GPS functionality for navigation and Wi-Fi and Bluetooth connectivity.

Great for anyone serious about a smartphone but not wanting to sign up to a lengthy contract to get one (since it comes network unlocked) if you're in the market this is definitely worth considering.

You will have to use the link below to get the money off, so click through and have a look for more info and the full specs of the smartphone.

Make sure you click back tomorrow for another Daily Tech Deal.
