Nikon eXtreme concept camera revealed

Classy compact

by Amy-Mae Elliott published on 12 March 2009

Designer Camillo Vanacore's vision for Nikon's next compact is one we'd love the company to take note of.

Described as an "all-weather" Coolpix device, it's waterproof and sports a glossy, curvy design that is just begging to be slipped into your pocket.

There's a very, very quick 360-degree vid on YouTube that gives you the once-round view if you want to see more.
