Speck adds more colours to its range of MacBook cases

Deck your Mac in purple, aqua, green and "hazard orange"

by Verity Burns published on 13 March 2009

Speck has launched new colours in its range of SeeThru hard shell cases for MacBooks.

Adding to the red and pink colours already available are purple, aqua, green and the limited edition "hazard orange" only available online.

Made especially for the 13- and 15-inch aluminium MacBook and MacBook Pro models, the new SeeThru cases are available now for \$49.95 from Speck's website and via the Apple Store as well.

Currently UK MacBook owners can only get their hands on the original range of red, pink and clear cases, but hopefully the larger range will filter through to us soon.
