Samsung launch ultra-small LED projector

Samsung has launched a pocket sized, lightweight projector, the P300 that weighs just 660g with dimensions of 127 x 93 x 50mm

by Stuart Miles published on 24 January 2006

Samsung has launched a pocket sized, lightweight projector, the P300 that weighs just 660g with dimensions of 127 x 93 x 50mm. According to Samsung, the new P300 is one of the smallest and brightest DLP LED mobile projectors on the market and boasts 24 ANSI Lumen brightness, an impressive 1000:1 contrast ratio and a resolution of 800x600. The projector also has an impressive battery life of 2.5 hours, making it ideal to take with you to off-site business meetings and the lamp will last for 10,000 hours. Featuring a special connecting cable and D-sub (PC), AV input, Samsung's P300 offers easy and complete connectivity for a variety of devices. The P300 Pocket Imager is expected to retail in the region of £499 and will be available in the UK from March.
