Daily Tech Deal: £70 off Sony Bluetooth speakers

Money saving deals, offers and innovations

by Amy-Mae Elliott published on 23 April 2009

Today's bargainous offering comes at you from Play.com, that's very generously offering a big, fat £70 off the recommended retail price for some Sony Bluetooth speakers.

The portable SRS-BT100 speakers will stream music from Bluetooth-enabled devices and offer a decent 30 Watts of sound backed up with a built-in amplifier for what's described as "thumping bass".

While you can wirelessly control the volume from said Bluetooth device if that's the audio source you're using, the speakers are also able to accept input from non-Bluetooth devices as well.

Finished in metallic black, the speakers get three five-star reviews on Play.com, are priced at £29.99 and are also offered with free delivery.

Anyone wanting to save a little more should note Play.com is also offering an addition 10% off the speaker when purchased with select Sony MP3 players.

Thank to L.Rawlins for the tip!
