## Firebox offers Album portable digital photo gallery

### Pics in your pocket

by Amy-Mae Elliott published on 24 April 2009

Firebox is offering the new "Album digital photo gallery" a 7-inch portable photo viewer that it says fits in your pocket.

About the size of a paperback, it has a flip-open leather cover and a 800 x 480 pixel resolution screen.

Firebox claims it will hold up to 40,000 images on its 4GB internal memory and can be expanded with an SD card.

With a slideshow function, as well as the option to scroll manually, the rechargeable battery offers 3 hours of juice.

Measuring 19.5 x 11.3 x 1.4cm, with a black or tan leather finish, the new photo-viewing gadget is on sale now for a somewhat steep £179.95.
