GEAR4 launches CMD-100 micro system

CD player with iPod dock

by Amy-Mae Elliott published on 30 April 2009

GEAR4 has announced the first of a new "diversified product range" for the company, the CDM-100, a CD micro system with dock for iPod as well as an FM/AM radio.

With a top-loading CD player, a universal dock for iPod that charges the MP3 player and an audio line-in port, GEAR4 says whatever format your music is in, "you can enjoy it all".

Other features include a clock with an alarm, that will let you wake to music from your 'pod, CD or the radio and 5 preset EQ settings.

Complete with remote control, the CDM-100 will be available across Europe from May while a version with DAB radio is planned for later in the year. Pricing is £89.99 or 119.99 euros.
