New MacBook touch mock-up revealed

Feast your eyes...

by Amy-Mae Elliott published on 1 May 2009

Designer Tommaso Gecchelin has put pen to paper, or mouse to mouse-mat more like, and dreamt up his version of what a MacBook netbook slash tablet could be like.

With a brilliant OLED display, the MacBook touch gets an iSpine that allows the device to be positioned in a variety of ways, and makes it suitable for a variety of uses.

To keep the design minimal, all ports are externalised on a "Magic Dock". Available in black or white, it's on sale now - in your dreams.
