## Harman Kardon launches MS 100 audio system

High-end CD playing radio slash iPod dock combo device

by Duncan Geere published on 12 May 2009

American audio manufacturer Harman Kardon has just dropped us word of a new audio system that it'll be bringing out this summer.

The MS 100 packs a CD player, an FM radio, an iPod dock, and a set of "high-end" stereo speakers.

The features don't stop there. There's also a 3.5mm audio jack input, a headphone socket, an alarm clock and it also features video out - so that you can view iPod content on your television. No DAB, sadly.

"Today's UK consumers want great audio systems that look as good as they sound", says Mark Hockey, marketing manager at Harman consumer.

The unit will only be available in black, and will cost around £500.
