## V-Jays headphones available now in the UK

### Lightweight over-the-head design

by Duncan Geere published on 20 May 2009

Swedish headphone design company Jays has announced the UK availability of its v-Jays headphones, which the company is describing as "lightweight, sleek and compact".

Weighing in at 59 grams - about the same as 30 teabags - the v-Jays claim to still feature a balanced sound with superior bass. They have an over-the-head design, but can be folded up for easy portability.

A 40mm driver is paired with 25Hz - 20kHz frequency response, 24 Ohm impedance and 98dB sensitivity. They come with a 60cm cord, a 70cm extension cable, and an embiggener for plugging into hi-fi equipment.

The v-Jays will be available in early June for £60.
