## PES 2010 for Wii due this Autumn

### Kickoff happening shortly

by Duncan Geere published on 8 July 2009

Konami has announced that the Wii version of Pro Evolution Soccer (better known as PES) 2010 will be released this autumn, shortly after the other consoles.

PES 2010 adds a game balance system for both attacking and defence that reduces the stamina available to players with the ball. Overuse of sprint and tackling will drain a player's energy and stop them making unbeatable runs.

There's also a new free kick system, where kicks are viewed from the player's perspective, allowing them to add pace and swerve. You'll also be able to move your keeper earlier when defending against a computer player.

PES 2010 will be coming out on Wii, PS3, Xbox 360, PC, PS2 and mobile phones this autumn.
