HANNSG launches 25-inch HH251HP monitor

"One-of-kind" boast for new HH series display

by Amy-Mae Elliott published on 9 July 2009

HANNSpree's HANNSG has unveiled a new line of "cutting edge" monitors. The new HH series of widescreen TFT LCD monitors will include display sizes from 18.5 inches up to a whopping 28 inches.

The first monitor to launch from the new HH range of HANNSG monitors is the new HH251HP. The HH251HP features a "unique" 25-inch display with a full HD 1920 x 1080 WUXGA resolution.

There's a hot key to transform the display from 16:9 widescreen to aspect ratio 4:3, useful dependent on content, a 15,000:1 "ultra-high dynamic contrast ratio", 300dc/m² brightness, 5ms response time, VGA, two HDMI ports and 2 x 1.5 Watt speakers.

With a high gloss, black mirror finish and curved, slim frame, the HH251HP is available now from www.misco.co.uk with a 3-year warranty for £183.99.
