More Dell Adamo XPS pictures surface

Teasing more than a sexy school girl

by Stuart Miles published on 13 October 2009

Dell continues its sneak peek approach to its Dell Adamo XPS laptop, and yep, we keep falling for it.

This time it's two pictures of the new model showing an interesting hinge design and just how thin it really is, 9.9mm if you haven't been keeping track.

That's as good as it gets, no word on a release date or specs, however judging by the pictures the laptop will feature a USB and display port socket. It doesn't look to feature a CD player, although you never know.

More details when we have them.
