## Lay-z-Spa offers portability with its inflatable hot tub

Fill it up and turn on the heat

by Amber Maitland published on 5 June 2006

When you think of an outdoor spa, the first thing that springs to mind is probably not portability. Lay-z-Spa is out to change that with its all new inflatable hot tub.

The 4-person spa holds 230 gallons of water, and features an Air Massage System (as you would expect from any good spa).

It has a quick heating system that plugs into any standard UK socket and heats the water to 104F, as well as a Clean Filtering System to keep the water fresh.

And no, you don't have to inflate it through your own lungpower; it comes with a motor that will have it up and ready to fill with water in no time.
