## Adobe Photoshop CS3 features rumoured to be revealed

Think Secret lets loose rumoured inside information

Adobe Photoshop CS3's interface will look a bit like Adobe After Effects 7, according to sources reporting to Mac blog site Think Secret.

The new look will feature better palette organisation with the ability to move all palettes into a single icon, as well as dedicated brightness adjustment for the interface itself.

The sources also say that Live Filters is one new feature that improves workflow as well as raw performance, bringing dynamic editing from Layer Styles to Filters.

The rumours also include news that non-destructive editing has been improved, so that layers can be saved as smart objects on which new editable filters can be applied.

Sources have also revealed to Think Secret that 3D objects can be imported and textures modified; video support has been enhanced; and a new Device Library contains listings for many phones and portable devices so that designers can check how their design will be viewed on screens of various shapes and sizes.

The same sources said that the release most probably won't come until March or April 2007.

The screenshot shows the Adobe website's product page for Adobe Photoshop CS2. At the top, there is a navigation bar with links for SOLUTIONS, PRODUCTS, SUPPORT, COMMUNITIES, COMPANY, DOWNLOADS, and STORE. Below this, the page title is "Adobe Photoshop cs2" and the main heading is "The professional standard in desktop digital imaging". The text describes Photoshop CS2 as the professional image-editing standard and leader of the Photoshop digital imaging line, highlighting its groundbreaking creative tools and adaptability. There are two images: one of the Photoshop CS2 software box and another showing a flower image being edited in the software interface. On the right side, there is a "Next Steps" sidebar with links for "Buy online", "Sales 801", "Volume L", "Download", and "Get supp". Below that, there is a "Photoshop" section with "Product Info" and a list of links: "Photoshop Fi", "Overview", "New features", "In depth", "System requ", "Camera raw", "Product activ", "Customer st", "Reviews", "Awards", and "Events & sen". At the bottom, there is a promotional banner for "Adobe Creative Suite® 2.3 Premium" which combines full new versions of Adobe Photoshop CS2, Adobe Illustrator® CS2, and Adobe InDesign® CS2.
