Tetris goes 3D with the Tetris 3D Cube

Computer game goes 3D

by Stuart Miles published on 31 January 2007

If you like puzzles and you like Tetris then the Tetris 3D Cube might just be the answer.

Looking like the Bedlam Cube we reviewed last year, the new 3D puzzle is based on the popular Nintendo game and requires gamers to place the pieces back into a cube each time.

According to the makers there are over 14,177 possible solutions.

Available in March for £9.99 will you be able to solve what Imagination Entertainment is calling "its most challenging puzzle to date".
