## Computer Generated image pushes the boundaries of reality

### Real or CG?

by Stuart Miles published on 22 February 2007

It seems it's getting harder to differentiate between reality and computer trickery.

That's right - you're looking at a computer generated image of Korean actress Song Hye Kyo, created by Indonesian CG artist Max Edwin Wahyudi.

Using movie stills as references and a range of CG software from zbrush to 3DMax for rendering.

Although Max Edwin Wahyudi said he experienced plenty of problems the results are stunning.
