Swashbuckling flash drives from A-Data

Savvy?

by Amy-Mae Elliott published on 25 May 2007

Positively the best tech film merchandising we've seen this year these flash drives come pre-loaded with some movie-themed wallpapers - and are available up to (pieces-of) 8GB. Garrrrh!

No word yet on pricing or availability - we're going to cash in some pirate booty now so we'll be ready to get oursÖ
