## USB Smart Button - the best gadget ever?

One press access to your fave website

by Amy-Mae Elliott published on 1 June 2007

What every loyal Pocket-lint.co.uk reader has been waiting for - the USB Smart Button gives you one press access to your favourite website.

The light-up (available with red, blue, green, orange or colour changing LED) USB-powered button plugs into any USB port and one push automatically launches your browser and pre-programmed website.

As you can see, we've mocked up a Pocket-lint.co.uk version and we think it's the next must-have gadget.

Only available for bulk orders from about \$6 depending on how many you want, you can find out more info on the USB Smart Button via the link below.

Or, if you want to hassle da Pocket-lint.co.uk management into getting some made up for your fave website then start sending some demands via the "Contact Us" page of the site
