## Alien abduction lamp, complete with little green men

### Beam me up

Sadly Lasse Klein's UFO lamp is only in design stage so won't be gracing our bedside tables any time soon, but we thought it merits a mention.

We especially like the attention to detail - including little green men peeking out of the windows.

In fact, it's so realistic it's bringing it all back Ö oh Ö nooo ... the flashbacks Ö the humiliation Ö the Ö PROBE!
