In about the time it takes to say, "Do you fancy a cuppa?" Tefal's new water heater will have produced the hot water to make the brew.

This new gadget claims to take only 3 seconds to make hot water, compared to the 2 minutes 47 seconds we have to wait for the average kettle to boil.

Tefal say this offers energy savings of up to 65% in comparison to a normal electric kettle. The Tefal Quick Cup kettle will go on sale next month in Currys for 60 quid.
