## Logitech launches USB Hub and Cordless Number Pad

New productivity tools for portable PCs

by Amy-Mae Elliott published on 20 June 2007

Along with two new notebook stands and two new notebook cases, Logitech has launched two new notebook peripherals.

The Logitech Premium 4-Port USB Hub for Notebooks provides laptop users with high-speed file transfer (up to 480Mbps) and port indicator lights. It also features a distinctive black design and comes complete with a carrying case and power adapter.

The Logitech Cordless Number Pad for Notebooks has convenient shortcut keys that enable effortless data entry to Microsoft Excel, calculator, and Internet Explorer.

A micro-receiver using 2.4GHz wireless connectivity helps provide seamless operation and snaps into the number pad for easy transport. Other features include an extended battery life of up to 6 months, a battery indicator-light and a convenient carrying case.

The Logitech Premium 4-Port USB Hub for Notebooks has a recommended price of £19.99 and the Logitech Cordless Number Pad for Notebooks should be around £24.99, both products are expected to be available in Europe in July.
