Brando gives us solar charger with two USB ports

We just need some sunshine to go with

by Amy-Mae Elliott published on 5 July 2007

Good old Brando - you can always rely on them to come up with the good stuff.

Like the planet? Want to solar power your gadgets? Even better, want to solar power TWO of your gadgets?

Introducing the "2-USB-Ports Multi-Solar Charger" that lets you do just that.

This solar charger can be recharged by sunlight (obv) but if you're running low on the sunny stuff can also run off AC power and, as Brando charmingly states, "Car power".

It works with most types of mobile phones and can juice anything USB up.

Lightweight, durable and portable, you're all set to go this summer.

And the planet thanks you.
