Tetris bookshelves - good idea, bit hard to fit together...

Made of I, J, L, O, S, T, and Z shaped pieces

by Amy-Mae Elliott published on 18 July 2007

These too-cool wooden "Tetrad" shelves come flat-packed so you have to put them together yourself.

Obviously, this has to be done to the accompaniment of the Tetris music, and moving increasingly faster as you progress.

Luckily, the horizontal bottom row will not disappear if you manage to complete it.
