Motorola signs deal to put projectors in phones

Working on prototype projector phone

by Amy-Mae Elliott published on 25 July 2007

Microvision has announced that they have signed a deal with Motorola to put their Pico Projector into some coming-soon Moto mobys.

The PicoP is an tiny laser based display engine that turns your mobile phone into a mini movie projector.

Exact details have not been confirmed, but they have said they are working together on a prototype phone at this stage that will use Microvision's WVGA 854 x 480 pixel wide angle scanner.
