## Shady Beats - an iPod speaker combined with sunglasses case

You couldn't make this stuff up...

by Amy-Mae Elliott published on 9 August 2007

Available in a variety of colourful designs the new Shady Beats are not only sunglasses cases, not only iPod cases, but are also iPod speakers.

These water-resistant, multi-tasking cases have a built-in NXT flat panel speaker that will pump out your iPod tunes to a maximum of 8 watts of sound.

Take a sunglasses case and separate iPod speaker onto the beach this summer? Not us.
