## New iPoor handset wows everyone - is this the real iPhone killer?

Could be coming to the UK on Orunge, O3, Vadafone and P-Mobile

by Amy-Mae Elliott published on 17 August 2007

We feel such fools here at Pocket-lint.co.uk, still banging on about the iPhone, when the Next Big Thing is already out there.

From Steve NoJobs, the iPoor is the handset that could kill the iPhone deader than a deceased dodo.

"The iPoor is the most gorgeous and simple phone ever created. Its beautiful, colourful outer casing is bound to turn heads."

"The huge pink antenna is not only attractive but functional, providing an astonishing 25 foot range."

Check it out now, and pre-register your details for the UK-bound HSDPA version, before they sell out...
