Cygnett GrooveToons Speaker and Alarm Clock System

Dock'n'clock

by Amy-Mae Elliott published on 20 August 2007

The new GrooveToons Alarm Clock comes in five metallic colours to exactly match the 2nd generation iPod nano family: green, pink, blue, black and silver.

They look like funky versions of a traditional alarm clock and will wake you up, play your music and charge your iPod nano.

A snooze button is included and the clock and alarm automatically displays on your nano when docked.

They might not be high-end audio offerings, but they're certainly highly fun...

£29.99, link below (available from this Friday onwards).
